## KASCO SharpTech Wood Cutting Blades

In addition to serving the supermarket industry, KASCO SharpTech is a quality manufacturer of industrial band saw blades and coil for wood cutting. Whether your need is a standard carbon blade for general wood cutting, or a premium, hardened tooth for more difficult work, KASCO SharpTech will provide the correct blade.

KASCO SharpTech manufactures a High-Carbon, Premium Wood Band featuring a heat-treated tooth design for a longer lasting blade. The tooth set is more aggressive and provides a quicker cut. This blade compares very favorably to tungsten silicone types used in re-sawing applications.

High-Carbon Steel bands are available in widths from 1/8" to 1" and in various lengths and thickness. We work with our customers to meet their specific requirements on tooth pitch and set so the job gets done right. High-Carbon Steel is also available in varied coil lengths and configurations.
